PROFESSIONAL SUMMARY

Artificial Intelligence & Machine Learning graduate with hands-on experience in Python, Machine Learning, NLP, Computer Vision, SQL, Django, and REST API development. Experienced in building AI-powered applications involving prediction, intelligent analysis, and backend integration. Completed a Python Django Developer internship with practical experience in REST APIs, CRUD operations, authentication, database integration, and API testing. Currently pursuing Data Science training focused on Python, SQL, AI/ML, and Generative AI, seeking an entry-level AI/ML or Data Science role.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript (Basic), C.
AI & Machine Learning: Machine Learning, NLP, Computer Vision, Deep Learning Fundamentals.
Backend & APIs: Django, Django REST Framework, REST APIs, CRUD, JWT Authentication.
Web & Mobile: HTML, CSS, Flutter, Dart.
Database & Tools: MySQL, Git, GitHub, Postman, VS Code, PyCharm, Android Studio.

EXPERIENCE

Data Science Intern | SMEC Technologies | Jul 2026 – Present

• Currently undergoing professional training in Data Science, AI/ML, and Generative AI.

• Completed training in Python programming and SQL, including programming fundamentals, data handling, database concepts, and SQL operations.

• Building foundational knowledge in data analytics and machine learning through structured training and practical exercises.

Python Django Developer Intern | Zecser Business LLP | Jun 2026 – Sep 2026

• Developed REST APIs and backend functionality using Python, Django, and Django REST Framework.

• Implemented CRUD operations, serializers, authentication, JWT-based authorization, permissions, and protected endpoints.

• Worked with database integration and API testing using Postman, while using Git/GitHub for version control.

PROJECTS

EDU AI – AI-Based College Management System

• Developed an AI-powered college management system using Django and Flutter with Admin, Faculty, and Student modules.

• Implemented AI features including content summarization, dynamic question generation, feedback sentiment analysis, student performance analysis, and descriptive answer evaluation.

• Used NLP techniques and cosine similarity for automated evaluation and integrated database-backed application functionality.

AgriShield – AI-Based Agricultural Support System

• Developed an AI-powered agricultural support system for crop recommendation/prediction and plant disease detection.

• Built the backend using Django and integrated a chatbot to support agricultural assistance.

• Worked on AI-based prediction and image-based disease detection functionality.

EDUCATION

Bachelor of Science in Artificial Intelligence & Machine Learning
Kannur University | 2023–2026

LANGUAGES

Malayalam | English
